

FishOxy Pond Aerator

Low-pressure, high-efficiency and durable, the FishOxy Pond Aerator is designed for everyday use on farms, providing essential oxygen to aquaculture systems such as ponds and large fish tanks. When paired with a Futurepump solar pump, it helps keep water healthy and well-oxygenated without adding complexity.

BENEFITS

- Low-pressure pump compatible: Designed to operate at less than 1.5 bar pressure
- High Oxygen Output: Improves fish health, reduces stress, and supports higher stocking densities.
- Low Noise Operation: Quiet, stable airflow suitable for all aquaculture conditions.
- Versatile Applications: Ideal for ponds & tanks.
- Easy Installation: With quick-connect fittings
- Fine Atomization
- Floating design: No fixture or stand required
- Light weight and portable: Easy to move to new locations
- Farmer fixable: Low number of parts, simple to service and maintain

PERFORMANCE

- Area covered: Radius of 3 meters
- Number of FishOxys per SF2 pump: 2 - 4

TECHNICAL SPECIFICATION

- Materials: Plastic ABS
- Hose size: 1 inch
- Pressure: <1.5 bar
- Weight:
- Dimensions:

INCLUDED IN THE BOX

- 2 x FishOxy Pond Aerators
- User manual
- Quick-start guide
